## DETAILED ACTION

### Lack of Unity

1. Claims 5 and 11-28 are pending in the application.
2. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 5, 11, 12, 16, 22 and 26 drawn to a process for producing a formic ester and a catalyst for preparing formic ester.

Group II, claim(s) 13-15, 17-21, 23-25, 27 and 28, drawn to a process for producing methanol and a catalyst for preparing methanol.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The invention(s) of Group I ~~is~~ entails (1) a process for producing a formic ester via the reaction of carbon monoxide and an alcohol in the presence of a catalyst which promotes the production of formic ester. Group II is drawn to process for producing methanol, which is a materially different process from that of Group I as two distinct products are, respectively, produced (formic ester versus methanol). Thus, there is no special technical feature that unites Group I with Group II.

A telephone call was made to John J. Kelly on 4/24/03 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
